

Asparagopsis Feed Pellets

(Asparagopsis armata, A. taxiformis)

Description:

Flowable pellets of dried and crushed Asparagopsis algae. As a bromoform-containing admixture for dairy and beef cattle kept indoors to inhibit methanogenesis.

Sensory:

- Appearance: Pellets of about 5mm thickness
- Colour: reddish brown, dark brown, dull
- Consistency: flowable, possibly dust and breakage
- Odour: maritime

Analysis*: Crude fat: < 0.5%, ash: < 15%, crude protein: >= 6%, moisture <= 15%.

Origin: Italy or Croatia (depending on batch)

Storage: cool and dry

Minimum shelf life: 2 years

Article in assortment:

- ALGENLADEN Asparagopsis Feed Granules (AAO90890).

*: As the algae are natural products, only average values can be given as analysis values. The actual values vary from batch to batch.
