

Feed Grade Sea Lettuce Flakes conv. Non-EU (Ao Nori, Ulva lactuca, Enteromorpha lactuca)

Flocken

Description: Crushed flakes of dried sea lettuce algae. As an addition to the poultry diet for laying and fattening poultry and pigs.

Sensory:

- Appearance: dried seaweed flakes 2 - 5 mm.
- Colour: intense green
- Consistency: thin-leaved
- Odour: umami, of iron/potassium, of the sea

Analysis*: Crude fat: < 0.5%, ash: < 15%, crude protein: >= 10%, moisture <= 5%.

Origin: Pacific ocean

Storage: below 25°C, dry

Shelf life: 2 years

Products: Flakes of about 4mm in 1 kg container (AAOH0810, plastic bag without bisphenol A).

*: As the algae are natural products, only average values can be given as analysis values. The actual values vary from batch to batch
